

## Dr. Ulrich Wegmann Curriculum Vitae

Dr. Ulrich Wegmann, (Senior Physician and Vice Head)  
Dept. of Dental Prosthodontics, Preclinical Education  
and Material Sciences  
Dental Faculty, University of Bonn  
Welschnonnenstr. 17  
D - 53111 Bonn  
email: wegmann@uni-bonn.de

Studies of Chemistry and Dentistry at the University of Bonn.

Since 1978 working as a resident and lecturer, since 1984 as a Senior Physician at the University of Bonn with the focal point on Implant-Prosthodontics, Function Analysis and CMD – Treatment.

Specialist for Prosthodontics of the DGZPW

Since 1978 lecturer at congresses and courses worldwide primarily specialised in Implant-Prosthodontics, Function Analysis and TMD-Treatment. Consultant for privat dental clinics in eastern european countries and some of the world's leading companies for dental equipment.

Member of the following societies: DGZMK, DGPro, DGFDT, DGI, DGOI, FDI, ADEA, ADEE

### Perfect function of fixed prosthetics by combination of electronic movement recording, virtual articulator and CAD/CAM

Perfect functional design of dental prosthetics can be achieved by the combination of electronic movement recording and transferring these data into the virtual articulator of a CAD/CAM system. This helps us to integrate the individual function of our patient into the design of the artificial occlusal surface. By programming the virtual articulator not only with values for the inclination of condylar guidance and Bennett angle but with the actual recorded movement data itself this enables us to simulate the patients movements in a more precise way than any mechanical articulator can do.
